ICEGOV is a series of International Conferences on Theory and Practice of Electronic Governance focusing on the use of technology to transform relationships between government and citizens, businesses and other arms of government to pursue good governance and sustainable development, founded and coordinated by UNU-IIST Center for Electronic Governance.

ICEGOV2007
- Place: Macao
- Participants: 202
- Countries: 44
- Submissions: 130
- Acceptance: 25%
- Proceedings: ACM

ICEGOV2008
- Place: Cairo
- Participants: 240
- Countries: 43
- Submissions: 127
- Acceptance: 50%
- Proceedings: ACM

ICEGOV2009
- Place: Bogota
- Participants: 440
- Countries: 30
- Submissions: 127
- Acceptance: 52%
- Proceedings: ACM

Background
- From government - describing initiatives, lessons learnt and challenges, and learning about the latest research results, and how such results are implemented by industry and other governments to address challenges.
- From academia - presenting EGOV models, theories and frameworks upon which solutions can be built, and learning about problems faced by governments, concrete cases, and how to deploy research prototypes.
- Industry and non-governmental participants demonstrating technological and socio-organizational solutions for governments and in return, learning about the challenges faced by governments and the latest research findings available for developing solutions.

Features
- Global Conference – All ICEGOV editions receive submissions and participants from over 40 countries.
- Multi-Stakeholder Conference – ICEGOV is attended by representatives from academia, government, industry, NGOs and international organizations.
- Networking Conference – ICEGOV brings together researchers and practitioners across thematic and national borders.
- Research and Practice Conference – ICEGOV attracts a healthy balance of research, practice and development.
- Capacity Building Conference – ICEGOV features a rich program of keynotes, tutorials, workshops, panel, posters, demos and paper session.
- International Development Conference – How public investments in IT contribute to development goals.
- UN Conference – UNU as founder and coordinator, and several UN organizations, notably UNDESA, UNECE, UNESCAP, UNITAR, UN ECLAC, UNESCWA and UNDP being involved.

Participants
- From government - describing initiatives, lessons learnt and challenges, and learning about the latest research results, and how such results are implemented by industry and other governments to address challenges.
- From academia - presenting EGOV models, theories and frameworks upon which solutions can be built, and learning about problems faced by governments, concrete cases, and how to deploy research prototypes.
- Industry and non-governmental participants demonstrating technological and socio-organizational solutions for governments and in return, learning about the challenges faced by governments and the latest research findings available for developing solutions.
